

Jarrold Curtis
Field Technician
m. 0408 924 300
e. jarrod@innovativegroundwater.com.au

Overview

Jarrold Curtis is a dynamic field technical officer who has a wealth of experience in construction and materials logistics. These roles have allowed Jarrold to develop a wide range of skills which make him a valued addition to the IGS team, most importantly an ability to problem solve, manage field logistics and communicate with a range of people across cultures.

His prior experience in the construction industry saw him travel throughout Western Australia and the Northern Territory, undertaking various building projects. This required an ability to organise and communicate with the numerous tradespeople to ensure timely delivery. Jarrold is extremely comfortable with remote area work, having spent his personal time exploring and camping in the Australian bush.
